D5.9 Updated Handbook: how to run a PULL

Version 2

Authors: Libera Amenta (UNINA, TUD), Anna Attademo (UNINA), Francesca Garzilli (UNINA), Michelangelo Russo (UNINA), Valentina Vittiglio (UNINA), Luca Mola (UNINA), Federica Paragliola (UNINA), Chiara Orlando (UNINA); Denis Cerić (IGiPZ PAN); Konrad Czapiewski (IGiPZ PAN).

Contributors: Andreas Obersteg (HCU); Viktor Varjú (RKK); Arianne Acke (OVAM); Hilde Remoy (TUD); Alexander Wandl (TUD); Cecilia Furlan (TUD).

Grant Agreement No.:	688920
Programme call:	H2020-WASTE-2015-two-stage
Type of action:	RIA – Research & Innovation Action
Project Start Date:	01-09-2016
Duration:	48 months
Deliverable Lead Beneficiary:	TUD
Dissemination Level:	PU
Contact of responsible author:	libera.amenta@unina.it; l.amenta@tudelft.nl;

Dissemination level:
● PU = Public

PM	Person Month
PO	Project Officer
PULL	Peri-Urban Living Lab
SC	Steering Committee

SP	SharePoint
UB	User Board
UoR	Use of Resources
WP	Work Package

Publishable Summary

5

This Deliverable presents with the on-line catalogue of Eco-Innovative Solutions (EIS), documenting, through a step-by-step guide, the methodology of Peri-Urban Living Labs (PULLs) developed by REPAiR and implemented in the six case studies.

The PULL methodology has been tested in the two REPAiR pilot cases and in the four follow-up cases producing six catalogues of EIS. The on-line tool shows the summary of the results achieved for each case in 6 posters, called 'Intermezzo' (figurative, from music & videogames: i.e. non interactive communication).

The aim of this on-line handbook is to share the PULL methodology widely, and to transfer it to researchers, public institutions and private parties, interested in implementing an Urban Living Lab.

Furthermore, a selection of significant EIS per each case has been made, and a search engine is available to look for EIS organised per flows, per cases and per keywords. Useful materials about the PULL methodology and about the selected EIS are made available to be downloaded - in high resolution - for everyone.

At this link you can find the 'D5.9 Updated Handbook: how to run a PULL', in order to browse through all PULL results.
